

Lab 8

Wednesday, December 23, 2015 9:23 AM

Task

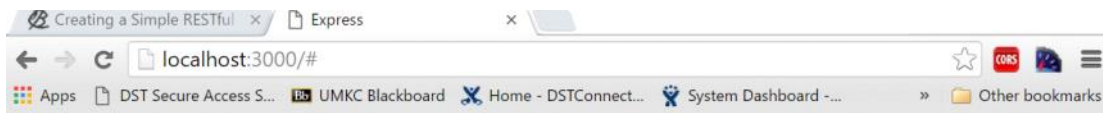

Extend your project created in Lab tutorial 7 with the following:

Use Java middleware and develop at least 4 rest services to create, read, update and delete data (CRUD) on MongoLab using MongoDB driver.

Submit the screenshots of your application under the github documentation folder.

Submit the code under the Source folder in Github.

Used tutorial provided at cwbuecheler.com/web/tutorials/2014/restful-we-app-node-express-mongodb/
